

SEYOUNG OH

San Jose, CA | 408-304-8254 | syoh2k@gmail.com | [linkedin.com/in/syoh2k](https://www.linkedin.com/in/syoh2k) | github.com/driffe

SUMMARY

Software engineer with full-stack, customer-facing field engineering, and IT operations experience - resolved 1,800+ incidents and shipped features serving 938K users. Fluent in English and Korean.

EXPERIENCE

KQED

San Francisco, CA

Junior Software Engineer

Mar 2026 - Present

- Fixed a production bug affecting users on KQED.org (900K+ monthly visitors), tracing the root cause across server-rendering and frontend caching to restore pages from a complete failure to a fully working state.
- Moved mobile app credentials from plaintext config files to a managed, encrypted vault, removing exposed secrets across 3 internal services and aligning the deployment process with security best practices.

Software Engineer Intern

Jul 2025 - Feb 2026

- Increased a file upload service's capacity by 25x (from 2 to 50+ requests/sec) by rewriting blocking database calls into a non-blocking request pipeline, eliminating timeouts that previously occurred under heavy load.

JKI INC

Campbell, CA

Field Application Engineer

Sep 2024 - Jan 2025

- Embedded at a customer site as the primary technical liaison between the customer's engineering team and JKI's product teams, supporting hardware qualification of NAND flash memory products.
- Built a C++ test automation tool that runs full hardware validation with one command, and discovered an additional 17% safe operating voltage range that informed the customer's production qualification spec.

Republic of Korea Army

South Korea

IT Operations Specialist (Sergeant)

Oct 2022 - Apr 2024

- Resolved 1,800+ technical incidents (5+ daily) for 1,200+ personnel across server hardware, on-premise databases, and physical network infrastructure (cable termination, switch configuration).
- Operated three segregated networks (defense intranet, classified command-and-control, and segregated internet) with custom access control, while maintaining 98% uptime on the unit's on-premise database.
- Awarded the Corps Commander's Commendation following a month-long US-ROK Combined Forces Exercise (12-hour shifts, two-shift rotation), and recognized as an Outstanding Soldier in basic training.

PROJECTS

CoffeeByMe (coffeebyme.com) | Lead Developer | Spring Boot, NextJS, AWS, GitHub Action *Jul 2025 - Present*

- Designed, built, and shipped an end-to-end, live, AI-powered coffee platform as the sole developer across separate US and KR market versions (v1 launched Jan 2026, v2 launched May 2026).
- Built a recommendation engine over 500+ curated coffee products using AWS Bedrock (Claude Haiku 4.5) for natural-language answers and Amazon Titan embeddings for semantic search.
- Built an automated data pipeline that scrapes roaster catalogs and uses an LLM to extract and normalize product details, turning unstructured web content into clean, searchable records.

AWARDS

1st Place, AI for Sports with NBA Platform with AI chatbot - IBM SkillsBuild AI Lab, 300+ teams (2025)

1st Place, Best Use of Perplexity with AI Medication Recommendation System - HackHayward (2025)

Top 10, SpartUp x Silicon Valley Small Business Development Center Pitch Jam (2025)

TECHNICAL SKILLS

Languages & Scripting: Java, Python, TypeScript/JavaScript, C++, SQL, Bash, Dart

Systems & Cloud: Linux/Unix, On-Promise Server Operation, AD/LDAP, Network, AWS, GCP, Docker, Kubernetes

Databases & Tools: MySQL, MongoDB, Firebase, Supabase, Redis, REST APIs, Git, Postman, Jira, Helm

Strengths: Customer Communication · Incident Management · Technical Documentation · Mentoring

EDUCATION

San Jose State University

San Jose, CA

B.S. in Software Engineering

Aug 2021 - Dec 2025
